MULTI-CURRENCY

[Get Started](#)

Why Add Multi-Currency Functionality?

Windward's Multi-Currency Add-On was built for businesses that frequently transact in tender other than their own currency. System Five automatically makes conversions giving you real-time visibility to the reports that you need to make critical decisions in your native currency.

Currency Conversion 

Properly account for the gains & losses you experience due to fluctuations in the FX Rates.

Customize Records 

Set supplier & customer records to display and convert to their preferred currency.

Invoicing & Purchasing 

Generate invoices and PO's in alternate currencies, so you can send & receive goods worldwide.
